- 52 - 53 Colour Range
- 54 - 55 Hardware
- 56 Customer Care Guide

Looking after our world and your wallet...

The rising cost of energy bills and the impact on the environment means we all want to keep our consumption to a minimum. By choosing our thermally efficient products you can keep the warmth in and the cold out.

19% more thermally efficient than a 48mm solid timber core composite door

17% more thermally efficient than a 44mm traditional timber panelled door

Doors were tested at the University of Salford's Energy House. This represents a typical Salford 1919 terraced house and its construction represents 21% of the UK's current housing stock. The house has been reconstructed in a fully environmentally controllable chamber, in which climatic conditions can be maintained, varied, repeated and patterns monitored. For the test, the inside temperature of the Energy House was 25°C with an exterior temperature of 5°C. All energy ratings are indicative only.

Quality you expect

We have the best product in the market by far. Our superior doors have a high impact resistant skin with a beautiful woodgrain finish which gives a Royale GRP composite door an authentic and premium aesthetic.

Foam filled core

The rising cost of energy bills and the impact on the environment means we all want to keep our consumption to a minimum. See previous page.

Water-resistant composites

Thanks to the water-resistant polymer composite rails, our doors will help keep water absorption away, this helps prevent a bowed door that could happen with solid timber core composite doors on the market.

Reinforced core

The reinforced central board gives you extra reassurance that your Distinction door is both solid and secure.

Engineered wood

For improved stability.

Decorative glass

Triple glazed and laminated as standard for extra security and peace of mind.

“A versatile door design,
and our most popular for
obvious reasons”

Colour

Telemagenta with Palma glass

- The PVCu door outerframe is supplied in White as standard.
- A limited number of coloured door frames are available (please ask your installer for further details).
- The composite door slab and PVCu outerframes are made from different materials, we therefore cannot guarantee an exact colour match due to the difference in surface finishes.
- Colours shown should be used for guidance only as the limitations in the printing process, may mean that colours vary from those illustrated.

Our standard colours

Bespoke Colours

Gramacho, Lisboa, Gramacho Glazed, Millenium, Ocean & Pinta: White or Bespoke.

nxt-gen Faldo: White, Distinction Anthracite Grey or Bespoke.

Espiche, Balaia, Santo Antonio & Benamor: Black, White, Gold Oak, Rosewood, Distinction Chartwell or Bespoke. White on internal side.

Our doors come with an exceptional 10 years surface warranty or 5 years for those colours denoted with an asterisk. Colours shown should be used for guidance only as the limitations in the printing process, may mean that colours vary from those illustrated.

Hardware

the perfect finishing touch

Indicative U-Values

The indicative U-Values throughout our brochure are based on a specification including: Distinction Signature PVC edgebanded door leaf, 70x70mm PVC frame with steel reinforcement and a thermally broken aluminium threshold using non-Low E glass. Differences from this specification may affect the value considerably.

Please get in touch if you require further information.

Heritage Lock

The Heritage lock also features slam shut locking, but replaces the contemporary bar handle with a traditional finger pull and thumb-turn escutcheon plate.

Available in PVD chrome, PVD brass and satin chrome finishes.

*Minimum door width to accept the Heritage Lock is 870mm overall.

Contemporary Lock

Make a statement with a modern bar handle. Available in a range of lengths, these handles compliment the mid-point locking position of the Contemporary lock, and ooze style and quality with their stainless steel construction. In addition to looking great, these handles and the ease of operation are available fitted inside and out, or to the outside only.

When your door is in the closed position, always lift the handle set to engage the deadbolt and hooks. This will help with keeping your door aligned in the correct frame position and help to combat thermal movement.

In order to comply with your warranty and to prolong the life of the surface, a small amount of care and attention is needed. How often will depend on where you live. In a coastal or heavily industrialised area or near a main road, cleaning may need to be more often.

We recommend that you only use warm soapy water (washing up liquid is suitable) with a lint free cloth and wipe dry with a soft clean cloth for the doors surface, as well as a little lubrication for operational parts; lock, hinges. Please refer to our 'Operation, Cleaning and Maintenance' instructions on our Website.

Please do not...

- Use abrasive cleaners or scouring pads
- Use pressure washers or steam cleaners
- Apply any type of bleach or solvent
- Apply any adhesives of any type or tack
- Have any contact with any sharp objects
